

Greening of Industrial Parks in the context of Global Urbanization

Prof. Suren ERKMAN
Head, Industrial Ecology Research Group

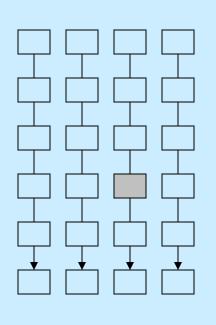

Green Industry Conference Ulsan, Republic of Korea, June 29, 2016

Green Industry: scales for implementation

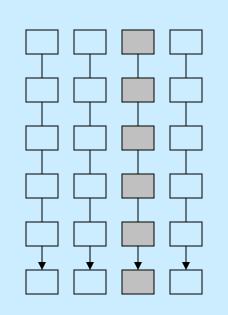

RECP

Extended RECP

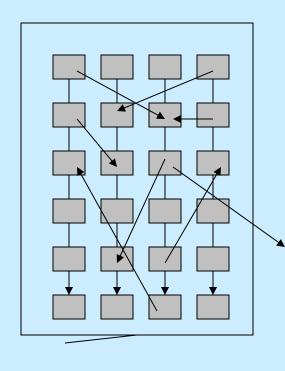

Systemic RECP

Value chains

Conindustrialization

Spatial pattern of industrialization

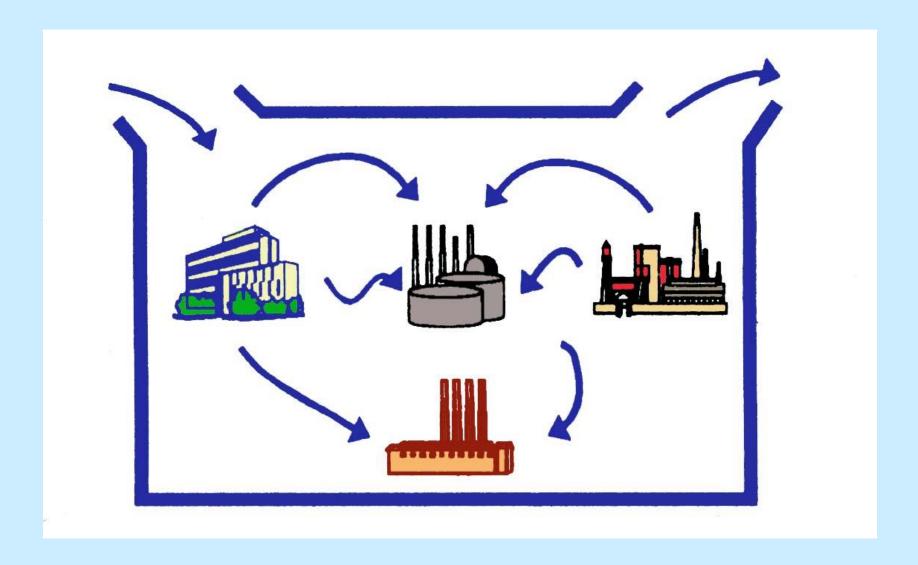

George T. Renner: Geography of Industrial Localization, *Economic Geography*, Vol. 23, N° 3, July 1947, pp. 167-169.

«Industrial interrelationships» (p. 180):

«There are relationships between industries, sometimes simple, but often quite complex, which enter into and complicate the analysis. Chief among these is the phenomenon of industrial symbiosis. By this is meant the consorting together of two or more dissimilar industries.»

Inter-enterprises synergies or Industrial Symbioses

Eco-industrial Parks (EIPs) or networks

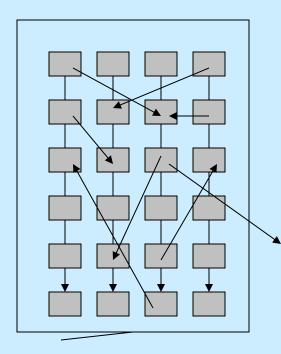

Green Industry: scales for implementation

Challenges:

- Implement RECP collectively (specific governance and tools)
- Take into account the disruptive dynamics of the globalized economy (e.g. 3D printing, etc.)

Systemic RECP (EIPs)

Conindustrialization

Spatial pattern of industrialization

George T. Renner: Geography of Industrial Localization, *Economic Geography*, Vol. 23, N° 3, July 1947, pp. 167-169.

«Conindustrialization» (p. 181):

«This tendency for fabricative industries to develop symbiotically is, after industrial maturation has been reached, very striking. Its net result is to produce urbanization and urban clustering on a large scale.»

UNIDO Project Manager: Dr. René van Berkel International Lead Expert: Prof. Suren Erkman, UNIL

UNIDO Global Review of Eco-industrial Parks (EIPs)
in Developing and Emerging Countries:
achievements, good practices and lessons learnt (2014/2014)

33 case studies in 12 countries (+ national policy reviews)

Follow up project starting in 2016

Suggestions and recommendations

- Need for awareness, promote EIP concepts
- Need for «institutional» definition of EIP
- Not many requirements for labels/certifications
- Need for capacity building
- •Need for relevant policies (remove barriers, etc.)
- •Need for dedicated mechanism/structure at the level of the park

General conclusion

Establish overall framework for mainstreaming and upscaling eco-industrial parks.

In particular:

- EIPs as key element of regional development
- EIPs as part of urban infrastructure
- Plan and invest accordingly
- Create business opportunities, attract investment

Perspectives / Suggestions

Launch global thematic initiatives, e.g.

- -Agro-industrial complexes in urban environment (3D farming, confined agriculture, closed loops)
- -Systematic valorization of ${\rm CO_2}$ (from concentrated sources or Direct Air Capture) for valuable products («carbon negative» EIPs).

CO₂ utilization

Thank you for your attention!
